

There are many brassware finishes available. Most items of door & window furniture are available in Polished Brass, Satin Chrome and Polished Chrome from stock.

However, a wide variety of other finishes are available to order. Selection of the most popular are shown on these pages. These finishes shown are from **Windsor Brassware**, one of our preferred brands due their wide selection of quality finishes that are available normally with two weeks.

Please note that finishes may vary between different brands. If you are purchasing a variety of brassware types such as door levers and window furniture, it is advisable to source these from the same brand as far as possible.

If this is not possible, then items can usually be plated so that the different items match.

Please ask us about other finishes that are available and we will be happy to provide you with a quote.

Polished Brass

This is a very popular finish for many traditional styles of door and window furniture. A wide variety of products are in stock available for immediate collection/despatch.

Natural Bronze

This is a very popular finish for many traditional styles of door and window furniture, especially Bungalow, Edwardian & Art Deco Styles. Windsor Natural Bronze is unlacquered, which means that the finish will wear to give it a more weathered looking finish. This finish is suitable for high traffic applications. Products in Natural Bronze are normally available to order in 3-4 days.
